

## Fantuzzi Parts

The Fantuzzi Group offers a plethora of material handling equipment and heavy machinery. The equipment consists of numerous equipment focused on loading, unloading and transporting goods. The railway freight sector and the port market require a large portion of their equipment.

Initially beginning in the 1960s as a zoo-technical and agricultural equipment manufacturer in the province of Reggio Emilia, Fantuzzi has grown to become a global leader in the heavy equipment industry. Now a global firm, the company gradually expanded after introducing successful advancements and overcoming a large number of technological challenges. Luciano Fantuzzi is the President and founder of the group. In 1967, the group started producing side lift trucks specifically for hauling timber and extended materials such as metal rods that weighed between three to 5 tonnes. The firm enjoyed frequent orders and completed 60 units in the 2nd; which was 5 times greater than their 1st year sales.

Within a short amount of time, the company took off exponentially. In 1968, a heavy-duty side-loader British model that was capable of lifting up to 32 tonnes inspired Luciano Fantuzzi. He wanted to create something that had more power with a similar style. After completing this machine and achieving his goal, Luciano began receiving orders from French Railways, Fiat and many others. Today, the Fantuzzi Group Italy has a large number of manufacturing plants around the globe including Italy, Germany and China. The company proudly exports to 162 countries.

Fantuzzi has kindly offered its patented expertise with nations all over the world with the goal of making the material handling, heavy equipment and transportation industries more efficient. Advancements and digital technology are helping to revolutionize the industry.
