

## **Order Picker License Casa Grande**

Order Picker License Casa Grande - Order preparation operation or also called order picking as it is more usually known is a process used within warehouse operations and consists of staff called order pickers. The order picker's task is to collect and take articles in certain quantities to be able to complete the client's orders prior to shipment. Order picking is a simple warehousing process. The efficiency in which this particular job is accomplished can be directly connected to the productivity of a supply chain. Thus, order picking is amongst the most controlled logistic methods. Order picking falls within the category of the warehouse management system.

There are some specific kinds of order picking. The main types include: wave picking method, pick to box method, picker to part method or piece picking, zone picking method and sorting systems method.

The pick to box method involves the order picker only filling the boxes with stuff that are from their specific station. The box then moves on to other locations to until the order is finish. In this particular technique, there is no movement of the order picker personnel. In the wave picking method, the order pickers move around to be able to gather the necessary products for numerous orders. The piece picking or picker to part method is similar where the order picker or pickers move to collect the stuff required but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, products are brought to the orderpicker by an automatic system like a conveyor system or an automatic storage system. In the zone picking method, every order picker is assigned to one particular area. They are responsible for just realizing order picking in this particular area.
