

Clark Forklift

At present, there are at least 350,000 Clark forklifts performing worldwide, and more than 250,000 in commission in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 exclusive brands of forklifts, with components covering more than 120,000 specialized parts for all of its automated equipment. Your regional Clark Supplier is your total source for availability of all your parts requirements supplied by Clark Totalift.

Clark's phenomenal Parts Distribution Stores are conveniently situated in Louisville, Kentucky, which serves both their customers and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Driven to offer the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to enhancing productivity and benefiting performance.

Globally, Clark has one of the most impressive dealer support networks. With over 550 locations globally, dealer representation in over 80 countries and 230 locations in North America, their high level of commitment to their consumers predominates the material handling industry.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of modernization in the industrial equipment and automated forklift industry. This exceptional commitment to safety is at this time a standard feature on every forklift.

Clark has a continual objective to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its manufacturing plants. Also, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any environmental limitations, thus placing them in a dominant industry position.

Supply Efficient Manufacturing

Clark has chosen the structure of "Lean Production" at all of its assembly facilities for the reason that this method is particularly economical and permits minimal use of resources. Developed to ensure maximum efficiency, this system is designed to discover and acknowledge the most effective ways for manufacturing facility management. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Engine Design

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product effectiveness while minimizing costs. The new value engineering agenda combines modern product improvement and offers superior client support and service within the industry.
